Appendices

Appendix A
The Monitoring Framework

This Authority Monitoring Report (AMR) is prepared under the 2004 Planning and Compulsory Purchase Act, Section 35 (as amended by the Localism Act 2011) and the subsequent Local Planning Regulations. The primary purpose of the Authority Monitoring Report is to share with the public the performance and achievements of the planning service, in terms of the implementation of the local development policies (the Local Plan) and local development scheme (LDS). Under the current Regulations, authorities can largely choose for themselves which indicators and targets to include in the report as long as they are in line with the relevant UK legislation, but they are required to report on the following:

- net additional dwellings (see Appendix H and main report)
- net additional affordable housing units (see Appendix H and main report)
- details of neighbourhood development orders made or neighbourhood development plans adopted (see Appendix F)
- Community Infrastructure Levy receipts
- action taken under the Duty to Co-operate (the requirement to work with various public bodies on planning issues – see Appendix G)

Manchester has not so far adopted a Community Infrastructure Levy Charging Schedule, but the other requirements are relevant, and are reported on in this AMR, as indicated.

The AMR comprises a mixture of direct and indirect measures of the successful delivery of the Core Strategy Spatial Objectives, including traditional development monitoring indicators such as the number of new dwellings and the amount of employment land developed, but also measures of socio-economic and environmental impacts such as employment rate, journeys by non-car modes, CO_2 emissions, air and water pollution, and the quality of key green spaces. A broader range of socio-economic and environmental measures are included in the State of the City Report 2022* (see below).

From the 1st April 2016, Local Authorities have been required, under the Self-Build and Custom Housebuilding Regulations 2016, to publicise and maintain a Self-Build and Custom

Housebuilding Register. This is a register onto which people or associations can be entered if they are interested in building their own home. The council's responsibilities in relation to the Self-Build and Custom Housebuilding register are that:

a) sufficient sites have to be identified to meet demand on the register (within 3 years of each expression of interest), and
b) these sites have to have planning permission (at least in outline).

Authorities are encouraged (via the latest NPPG) to publish headline data on the demand for self-build and custom housebuilding, including:

- the number of individuals and associations on their register
- the number of serviced plots of land sought
- the preferences people on their register have indicated, such as general location within the authority's area, plot sizes and type of housing intended to be built, where this information has been requested by the authority and provided by an applicant."

For each indicator in the data tables in Appendix H (Core Strategy Indicators), the latest figures for Manchester are given, along with an indication of recent trends, sub-regional/regional/national comparisons (if available and appropriate), and any local and/or national targets where they exist. Since not all the figures are available for the specific period 1 April 2022 to 31 March 2023, the time period for each indicator dataset is included in the tables.

This set of indicators, taken together, provides a measure of the effectiveness of the policies in the Core Strategy, as well as any unforeseen adverse effects, and should help to inform the review of the Local Plan, thus helping to deliver a flexible planning system that is responsive to local circumstances and the needs of the area.

As Manchester's Core Strategy was adopted in July 2012, its housing requirement figures became out of date in July 2017. In the absence of an up-to-date local plan requirement, the local authority is required to use the government's standard methodology to calculate the housing requirement, as set out in the Housing Deliver Test Measurement rulebook. The Core Strategy indicators (in Appendix H) which relate to housing delivery are still included in the

AMR, but the target for city-wide delivery is now the new requirement. Indicators relating to areas defined in the Core Strategy are included for information and to provide comparison with previous years.

Saved UDP policies are monitored via the most relevant Core Strategy indicators, as set out in Appendix C. The small number of Core Strategy indicators for which data is not currently available are listed in Appendix K.

A set of 'sustainability indicators' is identified in the Sustainability Appraisal of the Core Strategy to measure other aspects of the socio-economic and environmental impact of policies. However, a similar set of sustainability indicators is reported on in considerable detail in the Council's annual 'State of the City' report* and therefore, rather than duplicate much of this monitoring, the AMR focusses on the Core Strategy indicators to provide more depth to the development monitoring data.

* Manchester's 'State of the City' report provides an annual assessment of the City's performance against a set of sustainability indicators, to measure the City's progress towards the long-term vision and objectives outlined in the Our Manchester Strategy (2016-2025). The State of the City Report 2022 provides the latest analysis of progress towards the vision and objectives compared to the 2015 baseline. It is organised according to the five key themes in the Strategy's vision:

- A thriving and sustainable city
- A highly skilled city
- A progressive and equitable city
- A liveable and low carbon city
- A connected city

(akin to economy, society and environment, the three 'pillars' of sustainability).

The 'State of the City' Report 2022 can be found on the Manchester City Council website.

Appendix B
The Local Plan

The following development plan documents make up the current Local Plan for Manchester:

- **Manchester Core Strategy** (now under review, see below) – the long term spatial vision and planning strategy to 2027, which includes topic and area policies relating to, the economy, housing, environment, retail and transport, as well as general policies for the control of development (adopted July 2012); this is accompanied by the **Manchester Proposals Map** – identifies key areas for growth, employment and housing development, areas of protection and sites to which particular designations and policies apply;
- **Extant UDP policies** – City-wide and local area policies not replaced by the Core Strategy, 'saved' from the UDP adopted 1995 and subsequent Alterations (see Appendix B);
- **Greater Manchester Joint Waste Development Plan Document** - a waste planning strategy to 2027 (adopted April 2012).
- **Greater Manchester Joint Minerals Plan** - a planning policy framework to inform minerals developments and associated infrastructure up to 2028 (adopted April 2013).

There are currently three **Supplementary Planning Documents** (SPDs) that provide further detail on policies in the development plan documents:

- Guide to Development in Manchester SPD (April 2007)
- Providing for Housing Choice SPD (September 2008)
- Hot Food Takeaway Supplementary Planning Document (March 2017)

The Core Strategy is also accompanied by an **Infrastructure Delivery Plan** (February 2011) which identifies the infrastructure requirements to achieve the Core Strategy vision and explains how and when these will be delivered.

In addition to the documents above there are other documents which support the process of preparing Local Plan documents, these include:

- **Local Development Scheme** (LDS) - setting out the stages and the timetable for the preparation and/or review of the Local Plan;

- **Statement of Community Involvement** (SCI) - setting out how the community will be consulted during the preparation and/or review of the Local Plan, and consulted on planning applications;

These documents are also monitored regularly – see Appendices D and E.

Sustainability Appraisal

The final Sustainability Appraisal Report, to accompany the Publication Core Strategy, was produced in February 2011. The SA Report and Appendices are available on request by email to: planningstrategy@manchester.gov.uk or can be downloaded via the link below.

A new Sustainability Appraisal will be produced for the review of the Local Plan.

Website

Documents relating to the planning framework for Manchester, including the Core Strategy and the interactive Proposals Map (under Local Plan), can be viewed on and downloaded from the Manchester City Council website.

Review of Local Plan

Work began in 2020 on the review of the Local Plan (Core Strategy, Proposals Map and Extant UDP policies). The Manchester Local Plan will set out how the City should meet the need for new development over the next 15–20 years. It will identify where new development should happen, which green spaces and other aspects of the environment should be protected or enhanced, and how transport and other infrastructure will be improved. From February to May 2020, the City Council invited comments on the initial stage of the review. The Issues Consultation set out the key issues that will influence the Manchester Local Plan and identified approaches that could be particularly important for development in Manchester.

Approximately 560 responses were received from individuals, landowners, developers, campaigning organisations, statutory consultees and partner organisations. All comments will be considered when drafting the second stage of the review, the Draft Local Plan which is expected to be published in Summer 2024.

Appendix C

Saved UDP policies

A full list of the Saved UDP Policies can be found on the Manchester City Council website.

This table groups the Saved UDP policies by the most relevant Core Strategy indicator for each one.

Saved UDP policies	Most relevant indicators in AMR	Find under Core Strategy Policy
LL15 (pedestrian safety & disabled parking in shopping areas); WB2 (impact of employment development on traffic/parking); DB7 (parking on residential streets); WW8 (community centre allocation); DC26.1 – DC26.6 (noise)	Residents satisfaction with local area / neighbourhood as place to live	SP1
T1.8 (re. safeguarding Metrolink routes) WW10 (extra stations on rail line)	Amount of new residential development within 30mins public transport time of health facilities, schools, employment and major retail areas	SP1
Extant UDP policies: EW13 (control of further off-airport car-parking)	Total employment area developed for alternative uses [i.e. 'lost']	EC2
CC10, CC16, HC10, HC11, EM5, EM17, HU9, HU10, AB8, AB9, GO6, RF6, RF7, LL7, LL8, LL9, WB3, DB12, DB13, WW2, EW8,	Employment land available	Economy

EW9, EW11, EW12, RC20 (site/area allocations under 'Industrial and Commercial Uses') CC14, CC15, AB7 (site allocations for commercial employment/business uses)	- by type	
S1.2 (District Centres), DC10.2, DC12.2, DC12.3, CC16, CC18, CC19, HC4, EM11, AB5, GO6, RF6, LL7, LL13, LL14, RC20	Amount of completed retail, office and leisure development.	Economy
BM8, CC6, HC4, HC9, EM8, AB3, GO5, GO8, RF6, LL7, LL10, LL11, WW7, RC20 (housing site allocations/ improvement areas)	Total net residential units provided since 2009	H1
CC9 (permanent sites for Travelling Show People)	Number of new pitches provided for Travelling Show People [net]	H9
DC10.1, 10.3 – 10.5 (food & drink establishments)	Total proportion of space for additional town centre uses development that falls within the City Centre, district centres and local centres.	C1, C2, C8,C9
DC12.1, DC12.4 (Commercial uses above ground floor retail)	Proportion of non-retail uses within the Primary Shopping Area (ground floor)	C2, C10
S1.2 (District Centres), DC10.2, DC12.2, DC12.3, CC16, CC18, CC19, HC4, EM11, AB5, GO6, RF6, LL7, LL13, LL14, RC20	Amount and percentage of completed retail, office and leisure development in centres.	Centres

CB10	Percentage of A4, A5 and similar sui generis uses in centre	C10
Extant UDP policies: BM14, HC15, AB10, GO10, GO11, RF12, WB11, DB9, WW9 – safer roads, junctions & crossings; WW10 (extra stations on rail line); WW15 (cycle route); DC22.1 (protect pedestrian routes)	Trips made by non-car modes	T1 - T3
Extant UDP policies: WW11 (road access to Wythenshawe hospital)	Congestion: average journey time per mile	T1 - T3
DC19.1 (Listed buildings)	Buildings of Grade 1 and 2* at risk of decay	EN1-EN3
BM6 – Crab Lane Conservation Area RF3 – Victoria Park Conservation Area; DC18.1 (Conservation areas)	Review of Conservation Areas / up-to-date character appraisals	EN1-EN3
E3.4 (create a network of linear recreational routes), GO4, GO12-16, RF4, LL4, CB13, (including historic Nico Ditch), WB9, DB10	Increased levels of Green Infrastructure	EN9
CC3	No. of planning permissions compliant with EN10 (Safeguarding Open Space, Sport and Recreation Facilities)	EN10 - EN12

BM2,3,5 (all relate to open spaces/linear recreational routes); CC2; HC5; CB2,24,25,26,27,50,56; DB23,25; WW3; EW3,36	Changes in designated areas of biodiversity importance (SBIs)	EN15
DC28.1-3; DC28.12-14 CB41; DC28.4-11; 28.15-17 (minerals)	Production of primary land aggregates won	EN20
DC28.1-3; DC28.12-14	Production of secondary/recycled aggregates	EN20
CB15-59, DB15-29, WW12, WW13, WW14, EW17, EW37-41 (Mersey Valley)	Covered by: a range of CS indicators relating to GI, quality of open space, etc.	Environment

Appendix D

Local Development Scheme

Revisions since the last Authority Monitoring Report

The Council has revised the Local Development Scheme (LDS) since the previous AMR. The latest version came into effect in June 2022, and it covers the period 2022-2025. This is available online on the Manchester City Council website.

The Local Development Scheme

Manchester City Council is required to have a Local Development Scheme (LDS) in place to support the preparation of development plan documents.

The LDS 2022-2025 sets out the existing Development Plan Documents that make up the Manchester Local Plan.

It also sets out the proposed timetables for the new Local Plan documents to be prepared during this period, with details of each stage of their preparation. These include a strategic plan for Greater Manchester and the Manchester Local Plan.

Appendix E

Statement of Community Involvement

Manchester's Statement of Community Involvement (SCI) sets out how the Council will involve the community and other stakeholders in producing local development documents and in making decisions on planning applications. The current SCI was adopted in June 2018 and be viewed online on the Manchester City Council website along with a schedule of comments during the consultation on the draft SCI and the Council's response to these, and the Equality Impact Assessment Relevance Assessment.

In addition to setting out how the community and other stakeholders can get involved in the preparation of planning policies and how they will be consulted on planning applications, the SCI sets out how people will be able to get involved in Neighbourhood Planning processes and also how they will be consulted on non-statutory planning frameworks.

Appendix F
Neighbourhood Planning

The Localism Act 2011 introduced a right for communities to engage in Neighbourhood Planning. Communities can shape development in their areas through the production of Neighbourhood Development Plans, Neighbourhood Development Orders and Community Right to Build Orders. These need to be in accordance with national planning policies and with the Council's strategic policies set out in the Core Strategy and extant UDP policies.

Manchester has two Neighbourhood Areas, in Northenden and Castlefield; and one Neighbourhood Forum, in Northenden. No Neighbourhood Areas or Neighbourhood Forums were designated in Manchester in the period covered by this AMR, nor were any designations applied for. No Neighbourhood Development Plans or Neighbourhood Development Orders were adopted in this period.

Up-to-date details of Neighbourhood Planning in Manchester, including guidance and current designations, can be found on the Manchester City Council website.

Appendix G
Action taken under the Duty to Cooperate on Strategic Matters
Co-operation on Strategic Matters

The Localism Act 2011 introduced the Duty to Co-operate, which applies to specified bodies when they are preparing strategic planning policies, defined as policies which address issues affecting more than one planning area or strategic matters. The duty applies to the preparation of policies in the fullest sense, including work undertaken to support the policy, such as background evidence. The table below summarises the action that has been taken by the Council that could be considered to meet the duty to co-operate from 1 April 2022 to 31 March 2023. It includes co-operation initiated by other bodies whose strategic planning affects the Manchester area.

The Council also actively engages with other Greater Manchester districts through the Greater Manchester Combined Authority, Greater Manchester Local Enterprise Partnership, Greater Manchester Natural Capital Group (GM Local Nature Partnership) plus the Greater Manchester Planning Officers' Group, which meets once or twice a month to promote improved co-ordination and cooperation in planning and development across the City Region.

Meeting/ Strategic Issues Considered	With whom the issue was discussed (i.e. those covered by the duty) and how (email, letter, meeting)	Date discussions took place between April 22 and March 2023	Outcome of Discussion	Geographical Scale of the Issue
Greater Manchester Forrest Partnership	Meeting with Councillors, Lead Officers	20/04/22 22/09/22 25/02/23	delivering outline aim of GM tree and Woodland Strategy - " All Our Trees"	GM

Appendix H
Core Appendix Strategy Indicators – data tables

NB. The total **area** of the City of Manchester is **11,564 ha**. The City Centre (including the Higher Education corridor) covers 462 ha. The Regional Centre (including the City Centre) covers 1,141 ha. The Inner Areas cover 6,341 ha (including the Regional Centre).

Manchester's latest population estimate (mid-2023) is 605,400 (MCCFM W2021xiii, PRI, MCC 2023). The population, which has increased by approximately 38.9% in the last 20 years since 2002, continues to grow steadily after decades of decline in the second half of the 20th Century.

SO1. Spatial Principles

Objective: Provide a framework within which the sustainable development of the City can contribute to halting climate change. Within the context of mitigation and adaptation to climate change, the framework will guide the scale and distribution of economic, housing, transport, environmental, health, education and other service and infrastructure investment across the City

Policy SP1 Spatial Principles Indicator	Policy SP1 Spatial Principles Target	Policy SP1 Spatial Principles Latest figure	Policy SP1 Spatial Principles Trend	Policy SP1 Spatial Principles Comparators
Percentage of new employment land in the Regional Centre (within Manchester City Council boundary – figure relates to floorspace and includes E(g), B2, B8, retail, hotel and leisure)	Target: 70% (reviewed annually)	2022/23: 67% of Floorspace 60% of Land	2021/22: 66% of Floorspace 19% of Land 2020/21:	n/a

EN8 Adaptation to Climate Change

Indicator	Target	*Latest Figures*	*Trend*	Comparators
Number of planning permissions granted contrary to the advice of the Environment Agency	0	*0 (see below under EN14 – Flood Risk)*	*(see below under EN14 – Flood Risk)*	n/a
New developments incorporating Sustainable Urban Drainage Systems (SuDS)	Target: Year-on-year increase	22/23 5 developments incorporating SUDS	21/22 4 developments incorporating SUDS	n/a

Indicator	Target	*Latest Figures*	*Trend*	Comparators
			20/21 7 developments incorporating SUDS	

From April 2015 there is a national requirement through planning regulations to ensure, where possible, that SuDS are used on major new developments in England, and monitoring data is expected to improve. However, the National Standards for SuDS do not explicitly require the use of 'green' types of SuDS, and the main engineering solution still being used by developers in Manchester is underground storage tanks that outfall into a public sewer.

EN9: Green Infrastructure

Indicator	Target	Latest Figures	Trend	Comparators
Increased levels of Green Infrastructure Increase in quality, maintenance and function of Green and Blue Infrastructure	Target: In line with emerging Greater Manchester Green Infrastructure Strategy In line with the Manchester Green & Blue Infrastructure Strategy	2022/23 53% approximately 61 km^2 of green and blue spaces (refined as part of GM Ignition project). nb this figure may be refined further when consideration is given to green garden coverage.	2021/22 54%	n/a

EN10 - EN12 Open Space

Indicator	Target	Latest Figures	Trend	Comparators
Open spaces managed to Green Flag Award status	The first step towards the development of the Manchester Quality Standard has been completed with the digitisation of the Parks inspection programme. Manche ster are now focused	2022/2023 Two Green Flag sites – Alexandra Park and Heaton Park. 2022/2023 Blackley, Southern, Gorton & Phillips Park Cemeteries all attained Green Flag Award status in 2020.	No change for parks.	n/a

Indicator	Target	Latest Figures	Trend	Comparators
	on defining a consistent standard which will act as a baseline for regular audit that will support the monitoring of standards.		No change for cemeteries.	
Registered historic parks & gardens at risk		2021/22 (Latest date but no change anticipated during 22/23): There are 8 in Manchester, all Grade II (including 3 cemeteries) - 0 (0%) were at risk in 2021/22	No change	6% of registered parks & gardens were at risk in England in 2020

EN16 Air Quality

Indicator	**Target**	**Latest Figures**	**Trend**	**Comparators**
Days per annum on which air pollution reached 'moderate or higher' levels	Local target: Zero days p/a UK objectives/EU limits: NO_2 (nitrogen dioxide): no more than 18 exceedances of the hourly mean 200 µg/m³ (micrograms per cubic metre) PM_{10} (particulates): no more than 35 days >50 µg/m³ p/a	Jan – Dec 2022 During 2022, there were 4 days at Piccadilly Gardens (0 due to NO_2 and 4 due to PM10), 10 days at Oxford Road (2 due to NO_2 and 8 due to PM10) and 1 days at Sharston (Manchester South site replacement, 0 due to NO_2 and 1 due to PM10. In addition, there were 10 days at Piccadilly Gardens (2 due to PM2.5 and 8 due to O3 (ozone)	Jan – Dec 2021 During 2021, there were 2 days at Piccadilly Gardens (0 due to NO_2 and 2 due to PM10), 2 days at Oxford Road (0 due to NO_2 and 2 due to PM10) and 2 days at Sharston (Manchester South site replacement, 0 due to NO_2 and 2 due to PM10. In addition, there were 2 days at Piccadilly Gardens (1 due to PM2.5 and 1 due to O3 (ozone) 2020/21 ‡ During 2020-21, there were 3 days at Piccadilly Gardens (0 due to NO_2 and 3 due to PM10), 3 days at Oxford Road (0 due to NO_2 and 3 due to PM10) and 0 days at Sharston (Manchester South site replacement). In addition, there were 9 days at Piccadilly Gardens (3 due to PM2.5	UK average for urban sites was 8.6 in 2022, 4.1 days in 2021, 10 days in 2020 and 11 days in 2019.

Indicator	Target	Latest Figures	Trend	Comparators
			and 6 due to O3 (ozone)), and 11 days at Sharston due to O3 2019/20 In 2019-20, 3 days at Piccadilly Gardens (0 due to NO_2 and 3 due to PM10) and 5 days at Oxford Road (5 due to PM10, 0 due to NO_2), 0 days at Sharston (Manchester South site replacement). In addition, there were 3 days at Piccadilly Gardens due to PM2.5, and 12 days at Sharston due to ozone. 2018/19 In 2018-19, 5 days at Piccadilly Gardens (0 due to NO_2 and 5 due to PM10) and 28 days at Oxford Road (25 due to PM10, 3 due to NO_2), 0 days at Sharston (Manchester South site replacement). In addition, there were 6 days at Piccadilly Gardens due to PM2.5, and 18 days at Sharston due to ozone.	

† National and local COVID-19 lockdowns impacted local air quality during 2020; during the first national lockdown from 23 March 2020 there were marked reductions in NO2 levels at urban and roadside automatic monitoring locations in Manchester due to lower volumes of traffic, and Oxford Road levels were 58% lower than modelled 'business as usual' scenario concentrations. This reduction was less than expected from observed traffic reductions, as Manchester was a receptor of pollution transported from continental Europe and the south of the UK during this period. There is also evidence that solid fuel burning in domestic fires and stoves went up initially during the first lockdown, leading to local impacts on particulates. Further details of the effects of the pandemic on Manchester's air quality are included within a Defra (Department for Environment Food & Rural Affairs) report available here. It is likely that, during business as usual circumstances, parts of Manchester will remain above the annual limit for NO2.

‡ The Greater Manchester Air Quality Management Area (AQMA) was designated by GMCA on 1st May 2016, replacing the 10 district AQMAs. The AQMA shows areas that exceed 35 µg/m³ for NO2; the legal limit is 40 µg/m³ annual mean, but 35 µg/m³ was used on a precautionary basis given modelling uncertainties.

Development Management & Planning Obligations

DM1-3 Development Management

Indicator	Target	Latest figure	Trend	Comparators
Number of developments allowed on appeal	Zero	4 in 2022/23	4 in 2021/22 9 in 2020/21 23 in 2019/20 37 in 2018/19 30 in 2017/18 27 in 2016/17	n/a

PA1: Developer Contributions

Indicator	Target	Latest figure	Trend	Comparators
Total developer contributions per annum	No target	Contributions received in 2023: £3,297,918 22 s106 agreements were signed in 2022/23	18 s106 agreements were signed in 2021/22 16 s106 agreements were signed in 2020/21 19 s106 agreements were signed in 2019/20 16 s106 agreements were signed in 2018 19 s106 agreements were signed in 2017 13 s106 agreements were signed in 2016/17 17 s106 agreements signed in 2015 Contributions Contributions received in 2022: £996,194 Contributions received in 2021: £755,200 Contributions received in 2020: £1,780,067 Contributions received in 2019: £2,375,420.96[3] Contributions received in 2018: £966,865 Contributions received in 2017: £990,880	n/a

[3] During the financial year 2019/20 15 S106 agreements were signed and in 2020/2021 this increased to 22. To date for 2021/22 a further 11 have been completed. This increase in completed agreements during 2020/21 may seem odd given applications in the same period was down. This is likely to be a consequence of how long it can take to complete the legal process with some agreements taking 12 month or more to be finalised. That is agreements signed relate to applications received in previous years. The timing of a planning application, its decision, implementation and triggers for any s106 obligation are therefore difficult to timeline.

			Contributions received in 2016: £988,925 Contributions received in 2015: £902,093	

* The majority of s106 agreements in Manchester which provide for affordable housing do so via a financial contribution "towards the provision of affordable housing within the administrative boundaries of Manchester in accordance with policy H8 of the Local Development Framework Core Strategy".
